

## **TECHNICAL SPECIFICATION**

## **Zest Carpet Underlay**

## High quality polyurethane rebond carpet underlay

End Use Classification (BS 5808: 1991): L/U, Luxury Use

**Excellent thermal insulation** 

High degree of impact sound insulation

Guaranteed for 20 years or the serviceable lifetime of the carpet when used in the recommended locations

Roll size: 15sq.m of 1.37 m x 11.0 m

Suitable for stretch-fit installation of carpets

| Specification  | BS Requirements  | Result                                    | Method   |
|--|--|---|--|
| Nominal square weight  |  | 920 g/m²                                  |  |
| Nominal density  |  | 92 kg/m³                                  |  |
| Nominal roll weight  |  | 31 lbs                                    |  |
| Nominal thickness  |  | 10.00 mm                                  | BS 4051  |
| Mean original thickness from nominal thickness               | Maximum 12%  | 0.17%                                     |  |
| Difference between max. & min. original thicknesses          | Maximum 3mm  | 0.36mm                                    |  |
| Work of compression  | Minimum 50 J/m² after dynamic loading for 1000 impacts | 165 J/m²                                  | BS 4098 & BS 4052                                |
| Compression after dynamic loading                            | Minimum 2mm, maximum 7mm after 1000 impacts            | 6.6mm                                     |  |
| Retention of work of compression                             | Minimum 40% of original after 1000 impacts             | 86.3%                                     |  |
| Breaking strength - length                                   | Minimum 40N  | 79.7 N                                    | BS 2576  |
| Breaking strength - width                                    |  | 50 N                                      |  |
| Extension under force - length                               | Maximum 10% @ 40N                                      | 11.3%                                     |  |
| Extension under force - width                                |  | 38.9%                                     |  |
| Loss in thickness after dynamic loading                      | Maximum 15% after 1000 impacts                         | 1.8 %                                     | BS 4052  |
| Loss in thickness after static loading                       | Maximum 15% after 24hrs loading & recovery             | 1.0 %                                     | BS 4939  |
| Resistance to cracking                                       | Not greater than 50mm                                  | Pass                                      | BS 5808  |
| Odour  |  | No objectionable odour                    |  |
| Colour and appearance  |  | Orange facing with white nonwoven backing |  |
| Flammability   | Notes  | Result                                    | Method   |
| Hot metal nut test   | Tested in Interfloor laboratory                        | Low radius of effects of ignition         | BS 4790 & BS 5287                                |
| Thermal Properties   |  |   |  |
| Thermal resistance   |  | 2.64 Tog                                  | BS 4745  |
| Acoustic Properties  |  |   |  |
| Weighted reduction in impact sound pressure level (Delta Lw) |  | 39 dB                                     | BSEN ISO 140-8: 1998 and<br>BSEN ISO 717-2: 1997 |
| sound pressure level (Delta Lw)                              |  |   | BSEN ISO 717-2: 1997                             |

Please note: This document does not constitute a manufacturing specification. It details important technical performance and physical characteristics of the product only. Please contact the Technical Department for any further information.
